FULL-STACK DEVELOPER (MERN / Node.js / React.js / Next.js)

Professional Summary

I'm a dedicated Full-Stack Developer with 3+ years of experience building and launching scalable web applications. I work mainly with the MERN stack (MongoDB, Express.js, React.js, Node.js) along with Next.js, NestJS, and TypeScript. I have strong experience creating REST APIs, working with microservices, building secure login and authentication systems, and improving application speed and performance. I'm comfortable working in Agile/Scrum teams and delivering clean, well-tested code in fast-paced environments, including working night shifts aligned with EST time zones.

Technical Skills

- Languages & Frameworks: Proficient in JavaScript (ES6+) and TypeScript; experienced with Node.js, Express.js, React.js, Next.js, NestJS, HTML5, CSS3, Sass, and Tailwind CSS.
- Backend Development: Skilled in building RESTful APIs, basic GraphQL, authentication using JWT and OAuth, and working with relational and non-relational databases including SQL and MongoDB (via Mongoose).
- Frontend Development: Experienced with Server-Side Rendering (SSR), Static Site Generation (SSG), Context API for state management, and designing responsive, user friendly interfaces.
- Tools & Platforms: Competent with Git and GitHub for version control, API testing with Postman, containerization using Docker, and deploying applications on Render, Vercel, and Netlify.

Professional Experience

- Built and deployed full-stack web applications leveraging React.js, Next.js, Node.js, and Express.js.
- Implemented RESTful APIs and WebSockets to enable real-time data interactions with secure authentication via JWT and OAuth.

- Designed and optimized SQL and MongoDB database schemas to ensure scalable and efficient data management.
- Made apps faster by 30% through better code, caching, and database improvements.

Projects

ChatNova – Modern AI Chat Platform

GitHub: <https://github.com/mansi-24082006/ChatNova>

- Developed a fast, responsive AI chat web app using React.js, Vite, TailwindCSS, DaisyUI, and Zustand.
- Features smooth chat experience with typing animations, auto-scroll, and professional message bubbles.
- Implemented theme customization with multiple light/dark/retro/cyber/luxury themes and real-time preview.
- Built authentication-ready structure with login/signup and profile pages (backend-ready).
- Designed fully responsive UI for desktop, tablet, and mobile devices.

Notely – Full-Stack Notes App

GitHub: <https://github.com/mansi-24082006/Notely>

- Built a modern notes application with React, TailwindCSS, Node.js, Express, and MongoDB.
- Features secure login/signup, create/edit/delete notes, search, and tagging for organization.
- Designed a colorful, responsive UI with smooth gradients and user-friendly interactions.
- Backend secured with JWT authentication and encrypted passwords.

SmartUI – AI-Powered UI Component Generator

GitHub: <https://github.com/mansi-24082006/SmartUI>

- Developed a web app that generates responsive UI components instantly using AI.
- Users can choose frameworks, preview code live, and copy or download components easily.
- Built with React.js, TailwindCSS, and GSAP animations, fully responsive for all devices.
- Simplifies frontend development by eliminating repetitive coding tasks.

Certifications

Embedded Software Engineer – Ministry of Skill Development & Entrepreneurship, India
